Jui Kahate (カハテ ズイ)

Solution Engineering@ NEC | Technology Consultant – Agentic AI & Data Governance | Japanese Business Communication (JLPT N1, BJT-J2) | Ex-Rakuten & NTT Data | Language Trainer @ AtoJ Hirameki

India

Summary

Technology professional with 4+ years of experience across India and Japan, with a background spanning software engineering, cybersecurity, AI, Data Governance, and Japanese client engagement.Currently working as an Associate Manager in Japan Communications and Consulting Services (JCCS) at NEC Software Solutions, supporting AI and Data Governance initiatives for Japanese and global clients. My work involves client communication, solution discussions, requirement analysis, stakeholder management, demonstrations, and collaboration between business and technical teams, with a focus on Agentic AI and Collibra-based solutions.Previously, I worked as a backend engineer at Rakuten and Coredge.io, developing cloud-native applications using Python, APIs, GCP, Kubernetes, and Docker. Fluent in Japanese (JLPT N1) and Chinese (HSK 5), I enjoy bridging technology, business, and cultural gaps between global and Japanese teams. Outside of work, I teach Japanese at AtoJ Hirameki.

Experience

NEC Corporation

Video subtitle translations and curation for the language pair JP-EN

Rakuten
Bilingual Software Developer
February 2024 - June 2025 (1 year 5 months)
Tokyo, Japan

As a bilingual Security Engineer/Developer at Rakuten, Japan, I specialize in the development and enhancement of anti-fraud applications within the cybersecurity department. These critical applications are utilized by various financial services within the company to automate the reporting of phishing and fraudulent sites, ensuring a safer digital environment for our users. My work involves using both English and Japanese, allowing me to effectively communicate and collaborate in a diverse team setting.

In my role, I am part of the Anti-Fraud (Threat intelligence) Group, where I focus on end-to-end product management.

With a strong foundation in both software development and cybersecurity, I work to enhance our anti-fraud measures through cutting-edge technology and collaborative efforts.
